

CLAIMS

1. A portable bidet comprising:

5 a cylindrical member having a predetermined length for storing washing liquid, and an airbag section connecting to a rear end portion of the cylindrical member to be served also as a squeeze portion and supplying air to cause injection of washing liquid,

10 wherein the cylindrical member is formed of hard resin and a tip end thereof is formed into an arcuate shape and at least one injection port is provided therein, and the washing liquid is retained therein and an extruding member is disposed therein,

the injection port is closed by a film member releasable after storing the washing liquid,

15 the airbag section is formed of flexible or soft resin and has a sealable air inlet, and when not in use, collapsed and packed in a state of being positioned along the side surface of the cylindrical member.

2. A portable bidet according to Claim 1, wherein the washing liquid is silver ionic water or silver colloid solution of 1-20ppm in concentration.

20

3. A portable bidet according to Claim 1, wherein the extruding member is a slidable syringe member or a bag member.

25 4. A portable bidet according to Claim 1, wherein the airbag section is provided with a plug member or a valve member for clogging the air inlet.
